PROJECTS

• Budget Tracker

In this project I create a system for track the budget of a company. Employees can signup with include total budget price and after that employee add the expenses of project with date and also show the percentage of the expense from the total budget means total of all expenses employee can see if expenses total is equal to budget then no permission for add another expense. And also user can see their expenses analysis using line bar graph and also user Profile includes details(Personal,Education,Designation,Phone_no,email,website,about,father's name) and notify the user using notification(socket.io) if admin can add, delete or update the user expenses. And Admin can add user employee, delete the employee, update the employee. Admin can see employee expenses ,add employee expenses, delete the employees expenses.

• Tour Booking Management

in this project i developed that user can view tours with tour(destination, tour_duration,tour_price, tour_place images, tour_departure_location, tour_return_day and user view the weather details on the during the tour days). User can book tour with (user_email,user_name,no_of_adults,no_of_childs) if user book tour the user pay the tour. User can view there tour edit, delete and update.Admin can add tours,delete tours,add destination. I used 2 APIs in this project 1 openweathermap and 2 stripe.

• Attendance Management

In this project I create a system that user can mark the attendance of today (current day)

and also send leave request to the admin and admin accept user signup requests, users leave requests also reject these requests and also admin check each user attendances records and check which user is eligible for exam mean if user attendance is greater than 70 then eligible otherwise not eligible.

- **Multi Jobs Platform**

This is my final year project in this project i create a platform that get the jobs from Pakistan top jobs platform (indeed,byat,job_ustad etc.) using scraping and display the jobs based on search query on my platform with job details job title, job URL, job description and job company name. User can save job with all details and job URL is for source website link of that job.

EDUCATION

2024

- **Bachelors of Information Technology**
University of Education Lahore
3.63 / 4.0

INTERESTS

- Coding and Development Projects
- Tech Meetups and Conferences
- Reading and Research

LANGUAGES

- English
- Urdu
- Punjabi

CERTIFICATES & AWARDS

- Getting Started with Node.js From Simplilearn
- Introduction to MongoDB From Simplilearn
